Biological Exposure Indices (ACGIH) 1.5 g/g creatinine (urine - end of shift)

**Ethylbenzene 100-41-4**

Biological Exposure Indices (ACGIH) 0.15 g/g creatinine (urine - end of shift)

**Engineering Measures:**

Minimize exposure by partial enclosure of the operation or equipment and provide extract ventilation at openings.

**Respiratory Protection:**

For operations where inhalation exposure can occur use an approved respirator. Recommendations are listed below.

Other protective respiratory equipment may be used based on user's own risk assessment.

Where respiratory protection is required, use a respirator selected and in accordance with AS/NZS 1715 and AS/NZS 1716.

**Recommended:**

Full Face Mask with organic vapor cartridge, Type A filter (BP >65°C)

**Eye protection:**

Tight sealing safety goggles. Face protection shield.

**Skin Protection:**

Antistatic footwear. Wear fire/flammable resistant/retardant clothing. Gloves made of plastic or rubber. Wear suitable protective clothing. Apron.

**Hand protection:**

Wear protective gloves. Barrier creams may help to protect the exposed areas of the skin, they should however not be applied once exposure has occurred. Replace gloves immediately when torn or any change in appearance (dimension, colour, flexibility etc) is noticed.

**Gloves for repeated or prolonged exposure - non exhaustive list:**

Viton®/Butyl rubber, thickness: 0.7 mm, break through time: > 480 min

**Gloves for short term exposure/splash protection - non exhaustive list:**

Nitrile rubber (NBR), thickness: > 0.56 mm, break through time: < 60 min

The chemical resistance depends on the type of product and amount of product on the glove. Therefore gloves need to be changed when in contact with chemicals.

**Not suitable gloves - non exhaustive list:**

Natural rubber (NRL), thickness: 0.12 mm

Due to many conditions (e.g. temperature, abrasion) the practical usage of a chemical protective glove in practice may be much shorter than the permeation time determined through testing. Use PE gloves as under gloves for difficult situations like for instance: high exposure, unknown composition or unknown properties of the chemicals.
